## PERSONAL PROJECTS

### TalentTrace: An Online Job Portal

Technologies Used – MySQL, J2EE, Spring Boot, Hibernate, React.js, JWT

12/2024 - 02/2025

Developed a dynamic job portal using Spring/Spring Boot Framework to connect recruiters and job seekers, enhancing the hiring process with advanced features and secure interactions. Designed and implemented a role-based authentication and authorization system using JWT. Integrated video calling functionality to enable live interviews directly through the platform. Developed a real-time chat feature for instant communication between recruiters and candidates. Automated email notifications for seamless communication after user registration

### Roommate Finder: Web App

Technologies Used - HTML, CSS, Bootstrap, Express.js, Node.js, MySQL

09/2024 - 11/2024

Developed a responsive Roommate Finder web application to connect users with potential roommates, utilizing a clean and user-friendly interface. Designed and integrated a NodeJS back-end to ensure fast and scalable data handling. Secure and efficient database management, enabling smooth user registration, profile management, and matchmaking features.
